for KOHKIN

SE-S10 Electronic Cash Register

Highlighted Features

ISO 22196-conformant antimicrobial keyboard

Easy time and date setup

Flashing digits for time and date setting input when needed.

Helpful keys

PAPER SAVING

The PAPER SAVING key is to save printing paper (journal compressed printing / no receipt issuance). When the paper saving feature is used, an asterisk (*) appears on the operator display.

POST RECEIPT

Receipts can be issued after transaction finalization when the register is configured to print receipts and the paper saving mode is selected.

HELP

The HELP key is used for issuing assistance notes for frequently asked questions such as how to program date and time or how to install paper.

Drop-in paper loading

Effortless tax programming for up to four tax rates

Add-in and add-on tax system makes the whole tax operation simple and fast.

Powerful department functions

The SE-S10 features 20 departments with five keys by 4 shifts. Each department can be programmed with up to 8 characters.

Rear display

A built-in rear display allows customers to easily confirm sales transactions.

500 PLUs

Unit prices of 500 items can be programmed using up to 8 characters per item.

Support for up to eight cashiers

Simple character setup

Characters can be easily entered from the 10-key keypad to set the department name and PLU. For ease of operation, a 14-segment LED displays the last entered character. 200 pre-programmed product/category names facilitate programming.

Up to five lines for a store message on receipts

When you select a printer in RECEIPT printer mode, you can program 24 characters x 5 lines of text, such as the store name, to appear at the top of receipts.

Calculator mode

The calculator mode converts the SE-S10 for use as a calculator. Simply turn the MODE switch to "CAL."

Electronic journal

The electronic journal function captures registered transactions in memory for printing when needed.
